Subject: Approval of Optional Concentrations for Students Majoring in Economics

Faculty from the Department of Economics and Finance seek official approval for the optional concentrations within the economics major that are shown on the following page. The options are currently informal recommendations included for both the BA and BS degree seeking students (please see the attached check-sheets for these two degree options). The three optional concentrations are designed to help those majoring in economics develop a more specific program of study based on their future plans. At this time, students are only able to report this information on their résumé. If this recommendation is approved, the concentrations would become official and listed on their permanent record. Any of the concentrations will fit easily within the 120 hour BA or BS programs with a major in economics.

Thank you for your consideration and please don't hesitate to contact me if you have any questions.
